## PROPERTY DETAILS

THE CUSTOM COLORADO MOUNTAIN ESTATE YOU'VE BEEN LOOKING FOR: This unique hidden gem is nestled in the hills of Blackhawk - a serene oasis of privacy and paradise. The open and unique floor plan with over sized windows provide ample natural light and picturesque views of the mountain tops from every side of the home. The main floor master is designed to be a retreat within the estate - enjoy the double-sided fireplace while soaking in the sunken tub, or sitting on the balcony outside the suite. Just above the main floor, another over sized open room could serve as an additional bedroom or home office with an even more incredible view. A walkout basement with two bedrooms and second kitchen provides a bonus living area for family members or guests. You won't have to sacrifice living space for storage, as the property boasts an unattached structure large enough to hold additional vehicles, boat, snowblower, or anything you don't want taking up space in the home's attached two-car garage.
