Idyllic Mountain Retreat with Million Dollar Views

Far as the eye can see views make this an idyllic mountain home or getaway. Enjoy hiking, snowshoeing, and more from this cozy cabin set in an evergreen forest. The living room opens to the dining room and the just the right size kitchen and features a keep-you-warm wood burning stove and large picture windows that bring the outdoors in. Keep warm by the stove and watch the weather roll move across the horizon. Open the sliding door, step out on the deck to enjoy al fresco dining and the great mountain vistas. An en suite master bedroom has a $\frac{3}{4}$ newly updated bath with seamless shower. Two more bedrooms and a bathroom make room for all. Since 2015, new paint, floors and windows. The unfinished basement offers opportunity - add a rec room or bunk room with the additional square footage and access to a ground floor deck. Also check out the workshop space in the basement and the oversized one car garage. There are many reasons to make this your mountain retreat.
