

Single Family

1902 SQFT

3 Beds

3/1 Baths

2 Acre

PROPERTY DETAILS

Beautiful, private & quiet setting with amazing views from every corner of the home. Enjoy the aspens, open space and wildlife while partaking your coffee in the morning on the deck, playing around in the dirt in the detached greenhouse during the day, or sitting around your natural gas firepit in the evening.... Home has a domestic well so you can water outside or have horses And, it's totally remodeled, some of which includes a circular driveway, insulated & over sized 2 car garage with work shop, new septic tank, new well pump and wiring, new 'hail resistant' roof, new and/or remodeled bathrooms, newer high efficiency gas furnace, new wood trim & solid core doors... There's tons of mountain charm, a great open floor plan & large picture windows for a sunny open feel and lots of passive solar. You'll be just minutes away from the quaint town of Bailey with all the gift shops, coffee shops, and restaurants and have easy access to the Denver area and all that the beautiful mountains have to offer ...hiking, skiing, fishing, mtn biking & rock climbing to name just a few. . . . There's a lot to love! Call for your private showing.
