

Single Family

4209 SQFT

5 Beds

4 Baths

2 Car

1.19 Acre

PROPERTY DETAILS

This is an absolutely beautiful home has the most amazing views! Pictures do not do the breathtaking views seen from the entire property, almost every room and the 2 levels of deck with your hot tub to soak in the 100% Colorado feel! Views are the reason we live in Colorado.

You will LOVE the open feeling and the decks on two floors to maximize your outdoor living. When you aren't enjoying one of the decks and the hot tub, you will be able to enjoy the large kitchen and dining room. Wood floors throughout the main level. The living room ceilings go up forever with windows across the entire back of the home with spectacular views. All the higher window blinds are remote control. Also on the main level is the master bedroom with a deck. The only bedroom on the main level is the master. Going downstairs you will find a large family room, bedroom with full bath and an office. Then going out the walkout you have a large deck with the hot tub while you enjoy the sprawling mountain whitecaps. Upstairs there are 3 bedrooms and a very large loft overlooking the living room and offering fantastic views. The entire home is set up to maximize your views from inside and out. LIVE Virtual Walk through tour of the home available.
