PROPERTY DETAILS

This home is a fixer!! However most of the hard work is done, just move in and give it your own touches. The first floor of this home includes a LR, DR, half bath and a large family room which sports a wood-burning fireplace surrounded by beautifully accented brick, overlooking the nicely appointed deck and spacious fenced backyard specifically positioned to soak up all 300 days of Colorado's sunshine. With just a little love, the backyard can be an ideal garden oasis!

On the upper level you will find an unusually large and spacious master suite/w walk-in closet. Down the hall are three additional bedrooms and a full bath perfect for keeping the family on the same floor yet distanced enough from the master to allow for plenty of privacy!! The unfinished basement is waiting to be converted into a recreational, office or workout space. New siding, new garage door, new carpet, fresh paint..interior and exterior, roof certificate, sewer inspected and repaired and new GFCIs. Come make this your new home!! No showings until 1 October 2020
