PROPERTY DETAILS

Beautiful townhouse in Aurora! As you enter, you are greeted by laminate floors that lead into the open main floor area. The main floor has an open floor plan ideal for entertaining. Striking kitchen was been modernized three years ago with white shaker cabinets, quartz countertops, s/s slide in stove, s/s counter-depth fridge, and s/s microwave and dishwasher. Upstairs consists of two great sized bedrooms with good size closets. The full bath upstairs has been updated and includes fairly new vanity, tiled floors and shower as well. The finished basement includes 3/4 bath and laundry space. You'll also love the convenience of your reserved parking spot directly in front of unit. Additional storage available in attic space and in small storage unit in backyard. This is definitely a great home near it all.
