

 Townhouse
  1914 SQFT
  3 Beds
  2/1 Baths
  2 Car

PROPERTY DETAILS

Sought after town home in a great part of Littleton close to C470, shopping, Red Rocks Park and easy access to skiing, Lockheed Martin, DTC or downtown Denver is now available. This was the model unit when this complex was built. Gorgeous hardwood floors, large master suite plus two other bedrooms upstairs makes this a great place for anyone. There are mountain views and a greenbelt at the end of the street. The kitchen has SS appliances, access to the front patio and plenty of storage. There is a comfy living room and dining room separated by a 3 sided fireplace. Upstairs you will find a large master suite with a 5 piece bath and a huge walk in closet. There is another gas fireplace for cozy nights in the master suite. The two other bedrooms have double closets and plenty of space as well. The unfinished basement can add a whole new living area if desired. Roughed in plumbing is already there and the ceilings are high. Egress windows are in place. It's possible to block off the basement at the garage entrance if you wanted to turn it into a private living area. The solar panels are owned and will go to the new owner for low or no electric bills. There are beautiful window coverings on the newer Anderson windows with up down blinds.
