PROPERTY DETAILS

What a great property to call home! This one of a kind two story with a walk out basement is a true gem in the neighborhood. Built in 2013 it features over 3000 PLUS square feet of livable space, including 3 bathrooms, a master with its own full bathroom and 4 HUGE bedrooms. The kitchen equally as big, features an open layout to the dining room. The walk out deck adjacent to kitchen brings the whole area to live when entertaining. The property backs up to Sand Creek, offering plenty of privacy and spatular views. The basement is partially finished allowing the new owners to develop the space according to their needs! In addition to having extra room to grow it also offers a walk out access to the backyard onto a small patio. Schedule your showings now as this is one won't last long!
