1 Baths

4.13 Acre

PROPERTY DETAILS

This wonderful 4 acre mountain property is nestled within an old growth Aspen forest, tucked neatly in a quiet corner of Indian Mountain. Trim the trees back a little to reveal continental divide views to the north, or enjoy this gently sloped property the way it is. The home has an open floor plan with plenty of light, high ceilings, and a nice front deck for enjoying the fresh mountain air. Built in 2009, it sits on top of a full basement foundation which can be used for storage, or convert the space into a shop, garage, or whatever you need. Behind the home is a small bunk house and there is plenty of space on this massive lot to do some fun landscaping, gardening, or build a shop; check out the nice meadowland along the property's south border. The home is being sold partially furnished and is currently off grid, electrified via a propane generator and electricity connection is available. Lots of potential for a buyer desirous of diverse and usable acreage. Contact the Listing agent - Dan Windmueller for more info!
