PROPERTY DETAILS

Walking up to this beautifully crafted home from 1900, you would not expect what you will find! Soaring ceilings and exposed brick as well as a huge back yard are things you don't often see in this neighborhood. A highly functional floorplan that has over 3,100 square feet above ground for well under \$2M - you don't see that either! Another appreciated rarity is the front load, attached garage and driveway which is nice for security and convenience (keeping you out of the rain!) A large, well appointed kitchen with high end appliances and cabinetry, opens to a cozy sitting area with fireplace and flows through the French doors to the great deck and unexpectedly big back yard. The primary suite has vaulted ceilings and a huge attached bath, two walk-in closets and a west facing deck. Two other good sized bedrooms up plus a full bath. On the main is another bedroom and full bath. The natural light in all areas of the home is amazing, thanks to the 12 skylights and ample windows! This is a great place to live and the perfect home to call your own! Call me today to book a personal tour.
